

SUMMARY

Detail-oriented Automation Test Engineer with over 4 years of experience specialising in designing, implementing, and executing automated test strategies. Proficient in Testing Frameworks (Selenium), Behavior-Driven Development (BDD) & RestAssured frameworks (Cucumber), and adept at setting up SIT environments using AWS and Jenkins. Demonstrated commitment to continuous learning, leveraging new technologies to enhance testing processes and ensure high-quality software delivery. Dedicated to providing rigorous, reliable, and scalable test automation solutions that exceed industry standards and client expectations.

KEY COMPETENCIES

- Core Java
- Agile Scrum Methodology
- Selenium WebDriver
- Mainframe DB
- Web & Mobile Automation testing
- Jira
- Regression testing
- TestNg, Cucumber & REST Assured
- Bitbucket
- Openshift
- Insomnia/Postman – API Testing
- Git bash
- Jenkins CI/CD
- Seetest/Browser Stack (Mobile Testing)
- AWS

PROFESSIONAL SUMMARY

- I am proficient in creating automation scripts using **Java** with **Selenium** reviewing existing automation scripts, and maintaining them in a **Bitbucket repository** & executing manual **UI testing** using **Figma design** for both web and mobile devices.
- I have expertise in creating **SIT environments** on **AWS** with **OpenShift containers** and **Pods**. This includes deploying all necessary components and ensuring thorough environment cleanup ('pipe-cleaning') prior to commencing actual SIT testing.
- Using **Jira** for preparing tickets like – Test-plan, Test-set, test-executions, X-raytest & Defects. Once Testing is completed extracting the **test plan report**.
- Refactoring regression pack if required as per the feature delivered.
- Testing performed on (Manual & Automation)– Web & Mobile Application (Using **Seetest /Browser-stack / Appium** cloud – **Android emulator** & **iOS simulator** devices)
- I have experience executing test cases using Jenkins CI/CD pipelines and analysing comprehensive test reports.
- Supporting the **UAT** team, Tagging team for their testing.
- Proficient in designing and implementing test frameworks utilising the **Page Object Model (POM)**, with demonstrated expertise in framework architecture and development.
- Attending a retrospective call to give inputs for what went right & wrong.
- Using **mainframe** for data refresh/reset, **SQL** for checking config/property files, feature switches are correctly mapped or not.
- I have a strong understanding of **API testing** and extensive experience in performing manual API testing using tools such as **Postman** and **Insomnia** & for API Automation used **REST Assured**.

EXPERIENCE

MAVERIC SYSTEMS (CLIENT – BSF)– PUNE

Jan/2025 – Present

Senior Software Engineer-- QA Automation Test Engineer

- **Project :** BAU (Payment)
- **Roles & Responsibilities:**
 - Creating Automation script using Java with selenium – cucumber framework.
 - Maintaining and Refactoring regression pack & executing those scripts on monthly regression cycle.
- **Tool Used:** Java, selenium with cucumber, Jira, confluence, Bitbucket, Git-Bash & Appium Mobile Testing.

CAPGEMINI (CLIENT– BARCLAYS)– PUNE

Dec/2022 – Dec/2024

Associate Consultant -- QA Automation Test Engineer

- **Project :** Unsecured Lending Cards & Borrowing
 - Unsecured lending involves providing credit to borrowers based primarily on their creditworthiness and ability to repay, without requiring collateral such as real estate or vehicles.
 - Retail & Cards, Income Verified customer, Non Income verified customer loan approval process.
 - Green Loan approval process.
- **Roles & Responsibilities:**
 - SIT Environment set-up, Data setup, doing cross channel testing.
 - Creating Automation script using Java with selenium – cucumber, have executed both locally and through Jenkins.
 - Refactoring regression scripts & executing those scripts.
- **Tool Used:** Java, selenium with cucumber & TestNG, Openshift, AWS, Mainframe, Jira, confluence, Bitbucket, Git-Bash, RestAssured, SQL, Jenkins, Browser-stack (Cloud device iOS & Android)

ETEAM (CLIENT– CAPGEMINI)– MUMBAI

04/2022 – 11/2022

Associate Consultant -- QA Automation Test Engineer

- **Project:** Overdraft (OD)
 - Bank overdraft is a type of financial instrument that is provided to some customers by the bank in the form of an extended credit facility, which comes into effect once the main balance of the account reaches zero.
 - CMA OD, Add Party, Remove Party, Add OD, Reduce OD, Increase OD Remove OD.
- **Roles & Responsibilities:**
 - Creating Automation script, have executed both locally and through Jenkins.
 - Creating manual test cases & uploading it to jira for documentation.
 - Executing regression scripts once code is merged in release environment.

PIONEER C&D SOLUTIONS – PUNE

10/2020 – 10/2021

Trainee Engineer

- Roles & Responsibilities:
 - Creating & executing manual test cases & Regression Testing.
 - Creating Automation scripts.

EDUCATION

PUNE UNIVERSITY

2016 – 2019

Bachelor of Engineering
